Elzian Agro Internship program
Github Training

1. Go to the following link and learn about the github.
   https://lab.github.com/
   You need to complete **First Day on GitHub**, **First Week on GitHub**, **GitHub Pages** courses. Submit the course completed screenshot.

2. You need to create a resume website for you using the following technologies.
   - HTML
   - CSS
   - JS
   - Bootstrap (Optional)
   - JQUERY (Optional)

   Upload your resume website to your Github and publish the website on the Github pages.
   Follow the guidelines to upload your code to the Github repo.
   - You need to commit the changes to the development branch. You can't commit to the master branch.
   - Your repo needs to have a minimum of 2 pull requests.
   - You repo need to have 2 branches: master branch and development branch.
   For more info refer to the Github documentation:
   https://docs.github.com/en/get-started
